

PINKPIGGY FINANCE WHITEPAPER

SWAP-PIG DAO-PIG IRO

WELCOME TO PINKPIGGY FINANCE

Decentralized Defi The power of technology: Decentralized application platform with new and secure mechanisms, a diverse all-in-one Dapp ecosystem that brings convenience and safety to users: Pig swap, Pig Dao, Pig IRO, Staking and NFT

PINKPIGGY FINANCE

LEGAL CONSIDERATIONS

The information contained in this White Paper is subject to change or update at any time without notice and should not be construed as a commitment, promise, or guarantee by The PinkPiggy team or any other individual or organization mentioned in this white paper with respect to the future availability of services related to the use of the tokens, or concerning their future performance or value in any way. Neither an offer nor a solicitation to buy or sell any shares or securities is made by this document. It does not represent or form part of, and should not be interpreted as, an offer to sell or subscribe for, or an invitation to purchase or subscribe for, any securities, nor should it or any part of it serve as the basis for, or be relied on in connection with, any contract or commitment of any kind. In particular, the PinkPiggy team expressly disclaims all liability for any direct or consequential loss or damage of any kind whatsoever arising directly or indirectly from reliance on any information contained in the white paper, any error, omission, or inaccuracy in any such information, or any action taken as a result of the information contained in the white paper. This is not a solicitation to purchase or a financial suggestion; it is only for informational purposes. Do not trade or invest in any tokens, businesses, or organizations based on the information provided here. Any investment entails significant risks, including, but not limited to, price volatility, insufficient liquidity, and the possibility of a full loss of one's initial investment capital. Before making any investment decision, investors should conduct independent due diligence on the topics discussed in this document with the assistance of professional financial, legal, and tax experts.

PINKPIGGY FINANCE

INSPIRATION

The PinkPiggy team is a group of people with blockchain experience and passion, and the team composition fully reflects the spirit of decentralization. The team consists of smart contract developers and professional project operations team.

With the advent of DAO, people with many years of development experience have found out what a decentralized autonomous community platform really is and new solutions on how to solve problems that other platforms do not. body. With the work of combining DAO and DEFI we create an all-in-one eco system including AMM, Staking, NFT, DAO and launcpad

PINKPIGGY FINANCE

INSPIRATION

The main problems of the current DAO community platform focus on the following aspects:

Undoubtedly, with major institutions such as Paypal and Square accepting Bitcoin payments, the cryptocurrency has become more and more popular. But in the DAO community, things are different. Before the advent of the Anonverse, the DAO community platform was in a state of no practical application. Every DAO community platform seems to be a fairy tale community that only tells inspirational stories. No actual products are provided for community members to use, and even community members with technical capabilities cannot really participate in community development. The current DAO community platform does not consider the experience of ordinary community members, which makes it difficult for ordinary people without blockchain knowledge to DAO community.

PINKPIGGY FINANCE

INSPIRATION

Real value of IFO (Initial reference Offering).

Different from other launchpad platforms. We build an incubation platform with one criterion to support early investors, active contributors to promote projects launched on PIG IFO (Initial reference Offering).

PIG SWAP

Pancake swap, ape swap, baby swap...we learned a lot from them and built on Pig Swap.

Pig Swap is an Automated Market Maker (AMM) that is an automated market maker. Like other AMM platforms, Pig Swap uses an algorithm where orders are matched almost instantly thanks to a special algorithm that calculates the base price and adjusts the price according to reality.

NFT PIG

Normally NFT it is just an irreplaceable asset for collectible purposes. But with PIG NFT it is also used for staking and votedao.

PINKPIGGY FINANCE

COMBINATION OF
DAO & DEFI

With the combination of DAO & Defi we intend to create a fully integrated user-friendly platform and service that connects multiple experiences with the many decentralized financial products and services already available on the market. In addition, users will contribute a significant part to the development of the project through the DAO. The right decisions of many people will make the project more sustainable.

PinkPiggy is simply defi & dao Our goal is to make DeFi simpler and easier to use to create a better user experience for those who are intimidated by the learning curve, so we do lower barrier to entry. We will do this by focusing not only on innovating and creating a product that no one has ever created before, but also by working towards mass adoption of just the things that already exist and do. make that experience as seamless as possible for the user.

PIG DAO

Welcome to PIGDAO !

PIGDAO is a community of blockchain citizens who build a blockchain technology exchange community & fund public blockchain products

Decentralized Autonomous Organization. Decisions get made from the bottom-up

The first thing to know about PIGDAO is that we are mission first. Our mission is to build a blockchain technology exchange community & fund blockchain public products The DAO that governs

We believe that the consent of the governed is the only legitimate basis for government. This is why PINKPIGGY is governed by the community. (In order to make sure that PINKPIGGY is serving its community + founding mission first & foremost)

PINKPIGGY FINANCE

PIG DAO

What is PIGDAO?

PIG.DAO is a community of blockchain citizens who build a blockchain technology exchange community & fund public blockchain products.

On a human layer, PIGDAO is an egregore - a group of humans who coordinate to achieve our mission.

From a product perspective, we are building a suite of tools for DAO-era coordination of capital & culture.

From a governance perspective, we are governed by \$PIP.

We are progressively decentralize PINKPIGGY from a company to a DAO

There are 2 important concepts to know to understand how to interact with PIGDAO.

Most of the action happens on discord, website, or on twitter.

Stewards are ultimately responsible for governing PIGDAO.

PIGDAO is a vessel for humanity to get to the Quadratic Lands!

The PIGDAO is a vessel that we would like to take us to the Quadratic Lands - a place where open source software (and other public goods) are well maintained + healthy.

In the quadratic lands, public goods are funded by quadratic funding + other web3 native funding mechanisms.

The quadratic lands is a north star, we are still discovering where exactly it is and how to get there

PIG IRO

Different from other launchpad platforms. We build an incubation platform with one criterion to support early investors, active contributors to promote projects launched on PIG IFO (Initial reference Offering). Specifically:

PIGIRO is a seed incubator for potential blockchain projects. Projects they have to pass rigorous tests can launch and raise capital on PIG IRO.

PIGIRO's mechanism is to share to share more, which is to benefit those who refer the project through a multi-level referral system.

Projects when launching PIG IRO will be required to close a certain number of tokens to reward referrals. The more buyers you refer, the more tokens you will be rewarded with. But it will also have a certain limit to avoid inflation and sell-offs.

PINKPIGGY FINANCE

PINKPIGGY
ECOSYSTEM

Staking

Most of the DeFi services are targeting virtual asset tokens. However, in addition to providing traditional defi services, PinkPiggy Finance also provides a staking service for NFT assets, a new asset service. The NFT asset service is calculated by calculating the reward for staking by the market transaction price and final royalty. PinkPiggy Finance can distribute, stake and share profits through overseas NFT markets connected to its own NFT market. It is also a value competition system that can provide separate rewards by linking the special circumstances of NFT products

NFT PIG

Normally NFT it is just an irreplaceable asset for collectible purposes. But with PIG NFT it is also used for staking and vote dao.

Fairlaunch pre-sale participants will receive this NFT for free. When you own it, you can do anything

Sell it

Use it to vote and get \$PIP token

Use it for staking and profit

PINKPIGGY FINANCE

TOKENOMIC
